SUMMARY

Full-Stack Software Engineer with 3+ years of experience developing and maintaining production applications using Python, JavaScript frameworks (Vue/React), TypeScript and PHP Laravel. Currently building backend APIs, payment processing features and customer-facing financial journeys at Mary's Meals, integrating Stripe and third-party services across 16 countries. Experienced in full-stack development, REST APIs, relational databases, debugging and the software development lifecycle, with a strong foundation in object-oriented programming, data structures and software engineering principles. Focused on developing reliable, maintainable software and solving complex technical problems across the full stack.

SKILLS

Languages: Python, Java, TypeScript, JavaScript (ES6+), PHP, SQL
Frontend: React.js, Next.js, Vue.js, React Native, HTML5, CSS3
Backend & APIs: Flask, Laravel, Node.js, REST APIs, API integrations, Authentication
Databases: PostgreSQL, MySQL, Redis, Supabase, relational databases, SQL queries, data modelling
Software Engineering: OOP, data structures, SOLID principles, debugging, problem-solving, software design
Testing & Delivery: Jest, Playwright, unit testing, integration testing, Git, CI/CD, Agile, SDLC
Cloud & Tools: AWS, Linux, GitHub, Stripe, Algolia, OpenAI API, Google Analytics 4

RELEVANT EXPERIENCE

Full Stack Web & Applications Developer | Mary's Meals **March 2025 – Present**

- Develop and maintain production payment features and backend services using TypeScript, Vue.js, PHP and Laravel, building recurring payment and Direct Debit workflows with Stripe API integrations, server-side validation, transaction processing and error handling across 16 countries.
- Design and integrate REST APIs and third-party services including Stripe, Salesforce, Algolia and OpenAI, troubleshooting issues across frontend applications, backend services and external integrations while collaborating with developers, QA and stakeholders throughout the software development lifecycle to feed over 3 million children daily.

Full Stack Web Developer, Freelance **July 2024 – February 2025**

- Designed and developed a full-stack events and portfolio application using Next.js and TypeScript, implementing end-to-end booking and payment workflows through Stripe API integration, from event discovery to payment confirmation, contributing to a 20% increase in bookings.
- Built reusable, responsive frontend components and integrated CMS-driven content management and Cloudinary APIs, improving application functionality, media handling and user experience across devices.

Software Engineer Teaching Assistant, Queen Mary University of London **January 2023 – March 2025**

- Mentored 7 development teams through 12-week software development lifecycles, supporting application design, full-stack development and debugging using Next.js/React.js and React Native, achieving a 95% project completion rate and earning the Best Software Engineering Award.
- Delivered practical programming and networking sessions to 200+ students across 5 modules, explaining object-oriented programming, software engineering concepts and debugging techniques, achieving a 97% issue resolution rate.

PROJECTS

Portfolio: www.rohailramesh.com (for additional information and projects)

Machine Learning App for Preventing Luteal Phase Defect & Overcoming Period Product Poverty **Sep 2023 - May 2024**

- Developed a cross-platform mobile application featuring an LSTM model to predict luteal phase length with 80% accuracy, a medical chat assistant and personalised campus reminders to improve menstrual health and access to free period products.
- Technology Stack: Python, React Native, Flask, Supabase, TensorFlow, Pandas, NumPy, PostgreSQL

Cross platform App for Global Accommodation and Consultant Networking (FDM Group) **January 2023 – April 2024**

- Led 7-member team to develop cross-platform global accommodation and networking application in 12-week sprint cycle for a consultancy firm, earning Best Software Engineering Award
- Technology Stack: Next.js, React Native, Node.js Redis, Tailwind CSS, Redux, Framer Motion, Google API, Chakra UI

EDUCATION

- Bachelor of Science (First Class Hons), Computer Science, Queen Mary University of London
- A-Level Maths (A*), Further Maths(A), Physics (B), Kettering Buccleuch Academy

ACHIEVEMENTS

- Best Next-Generation Enterprise Chat Platform for 2030, Work in Fintech Summit London **September 2024**
- Best 2nd Year Software Engineering Project, Queen Mary University of London & FDM Group **April 2023**
- Best Academic Project Winner Computer Science & Engineering Oxford Brookes Summer School **April 2020**
