SUMMARY

Full-Stack Web & Applications Developer building scalable, user-focused products across fintech, healthcare, education, and non-profit sectors. Currently developing multilingual supporter platforms at Mary's Meals, creating accessible, cross-device experiences that drive engagement and donations for a global charity serving over 3 million children daily. Skilled in JavaScript, TypeScript, Vue.js, React, and API integrations, with experience implementing Stripe, Algolia, OpenAI, and Google Analytics. Passionate about building intuitive, high-performing applications combining clean, maintainable code with thoughtful UI/UX design.

SKILLS

- Languages: JavaScript (ES6+), TypeScript, PHP (Laravel), Python, Java, SQL / NoSQL
- Web, AI & Integrations: Vue.js, React / Next.js, React Native, REST APIs, i18n, OpenAI API, Stripe, Algolia
- Cloud & Product Tools: AWS, CI/CD, Git, Linux, Jest, Google Analytics (GA4), Figma

RELATED EXPERIENCE

Web & Applications Developer, Mary's Meals March 2025 – Present

- Building responsive, multi-language supporter journeys using Vue.js and modern TypeScript, serving a global audience across devices. Designing intuitive donation flows, story pages and regional content, improving accessibility and engagement
- Integrating Stripe (payments), Algolia (search), Google Analytics (behaviour insights) and OpenAI features to support data-informed improvements that contribute to ongoing digital transformation initiatives supporting over 3 million children daily

Web Developer, Freelance July 2024 – February 2025

- Developing, user-friendly web applications with a strong frontend focus using modern tech stacks, including a custom portfolio site for a professional artist featuring intuitive event browsing, CMS-driven content management, and seamless cross-device layouts to showcase work and engage visitors effectively.
- Designed and built responsive UI components with ShadCN and TypeScript, creating a smoother, more accessible user experience. Integrated Stripe for seamless bookings and Cloudinary for media handling, leading to a 20% increase in event bookings.

Computer Science Teaching Assistant, Queen Mary University of London January 2023 – March 2025

- Mentored 7 student teams through full 12-week SDLC cycles to build well-being web and mobile applications for FDM Group, guiding them on frontend design with React and React Native to create responsive, user-centered interfaces resulting in a 95% project completion rate and earning the Best Software Engineering Award through strong agile practices and clean, intuitive UI/UX focus.
- Led hands-on lab sessions for 200+ students across 5 core modules, breaking down complex programming and networking concepts while demonstrating practical frontend development techniques, delivering clear, engaging explanations that achieved a 97% issue resolution rate and helped students confidently build interactive, cross-platform apps.

EDUCATION

Bachelor of Science (First Class Hons), Computer Science, Queen Mary University of London September 2021 - July 2024
A-Level Maths (A*), Further Maths(A), Physics (B), Kettering Buccleuch Academy September 2019 - July 2021

PROJECTS

Portfolio: rohailramesh.com (for additional information and projects)

Machine Learning App for Preventing Luteal Phase Defect & Overcoming Period Product Poverty Sep 2023 – May 2024

- Implemented LSTM model for preventing miscarriages & infertility and overcoming hygiene product poverty amongst academic institutions with 80% accuracy.
- Technology Stack: Python, React Native, Flask, Supabase, TensorFlow, Pandas, NumPy, PostgreSQL

Cross platform App for Global Accommodation and Consultant Networking (FDM Group) January 2023 – April 2024

- Led 7-member team to develop cross-platform global accommodation and networking application in 12-week sprint cycle for a consultancy firm, earning Best Software Engineering Award
- Technology Stack: Next.js, React Native, Node.js Redis, Tailwind CSS, Redux, Framer Motion, Google API, Chakra UI

ACHIEVEMENTS

Best Next-Generation Enterprise Chat Platform for 2030, Work in Fintech Summit London September 2024
Best 2nd Year Software Engineering Project, Queen Mary University of London & FDM Group April 2023
Best Academic Project Winner Computer Science & Engineering Oxford Brookes Summer School April 2020
